

### Jesus is the rock

Far too many years I spent  
In anger and in pain  
A shadow hanging over me  
And madness in my brain

He offered life in sacrifice  
He died to set me free  
He put my life on solid ground  
And now he lives in me

Now he shows me his way  
Now he shows me his word  
Now he shows me his love

Jesus is the rock  
Jesus is the rock

### Child of the night

I'm a child of the night  
Rising up with the dying of light  
I'm a child on the run  
Through a city without sun

I'm a child of the stars  
Of drums and electric guitars  
I'm a child of the earth  
Sentenced to die  
From the moment of birth

A rider on a horse of heavy metal  
A beacon burning bright  
Desperate like a suicide

Child - I'm a child of the night  
Child - I'm a child of the night

I'm a child of the moon  
On the road till the dawn of doom  
I'm a child on his knees  
Praying for release  
Won't you help me please...

### Lift you up

I'm gonna lift you up  
I'm gonna give you praise  
I want to know your heart  
I want to know your grace

I want to hear your voice  
I want to hear your word  
The sweetest sound  
I ever heard

You gave your life for me  
Now I can live for you  
You loved me first  
So I can love you, too

Lord, you are the light on my way  
Lord, you are the light on my way

### Confidence

I trust in Jesus, I trust in Jesus

Put your yoke on me, I'm gonna bow  
I promise you to carry it somehow  
That load is not as heavy as it seems  
Teach me what humility means

Read your decrees to me, I'm gonna try  
I promise you to keep them till I die  
That law is not as outlived as it seems  
Teach me what obedience means

Give your sword to me, I'm gonna fight  
I promise you to stand for what is right  
That war is not as hopeless as it seems  
Teach me what courage means

Show your way to me, I'm gonna walk  
I promise you to practice what I talk  
That road is not as rocky as it seems  
Teach me what confidence means

Send your joy to me, I'm gonna live  
I promise to spread out what you give  
That life is not as lonely as it seems  
Teach me what vitality means

### Holy is the Lord

Holy is the Lord  
Mighty is the Lord  
Worthy is the Lord

I will follow you all the way  
Holy is the Lord, holy is his word  
Worthy is the Lord to be praised

### Surrender it all

I want to open my heart  
Whenever you call  
I hold nothing back  
I surrender it all  
Every word from your lips  
I want to hear  
Wherever you send me  
I want to be there

Jesus teach me everything about you  
Jesus guide me, I will follow you

### Alpha and Omega II

You have created the light  
Created the earth  
Created the life  
Created the world

You set your children free  
You take our sins away  
You guide us through the night  
Your spirit leads the way

You will return in glory  
Then every knee will bow  
A new Jerusalem will come  
And you will reign in power

You are Alpha and Omega  
The eternal God

### Desolation

Smoke on the street, dust on my face  
Blood on the ground  
Dead on my feet, a ravaged place  
A wailing sound  
Steel bones give form in terror zone  
The arms of fate  
The concrete torn, a grave of stone  
Is it too late

How can we still live on

### The Dragon

Fire falls from heaven  
Murder from the sky  
A giant beast is rising  
Bloodthirst in its eyes

Farewell to all mercy  
Kiss love and hope goodbye  
Too long we fed the monster  
Now the innocent must die  
I don't know why

In hunger roars the dragon  
On wings of death it flies  
Breathing fire on the cities  
A world to terrorize  
The nations jerk in fever  
To hear the battle cry  
A war to end all wars  
They're spreading out the lie

I don't know why

I have read the prophecies of John  
This age is gonna end  
Our destiny to come

In my dreams I saw the dragon in the air  
Breathing smoke  
And raging fire everywhere  
Pain and sorrow,  
Death and suffering out there  
Lord, have mercy on your children

### Knight song

You are the ruler on the throne  
You are the warrior with the sword  
You are the judge with the scales

I swear allegiance to your arms  
What you command I won't ignore  
I will obey you till the end

Your banner shall be praised  
Your kingdom be restored  
In justice and in grace

Show mercy to this nation  
In wrath the dragon roars  
I bow my knees in adoration

King of Kings and Lord of Lords

I stand here as your knight  
Armed and ready to fight, be my guide

### Keep the flame alive

Have you ever...  
Seen the embers of a campfire  
Extinguished by rain and lack of wood  
I've seen the dying of the light before  
But I have never understood

One crippled log of oak  
Still glowing inside  
But will it die or will it live  
Can I find branches in the pouring rain  
Remember me, Lord, and forgive

Where is the peace, where is the joy  
How do I find hope and faith in you  
I'm a man now, no longer a boy  
Sometimes it's hard  
To see the things you do

Put some petrol on the fire  
Let the spirit burn in heat  
Fuel to make the flames burn higher  
More of you is what I need

Sometimes it's hard  
To keep the flame alive  
The flame alive, the flame alive

### You cover me

Flowers of ice you melted away  
You clothed me in white  
You gave me a home  
In your temple where your children play  
You promised me I won't be alone

On the fields of death  
You saw me running  
And you carried me home  
Through the fire  
To your temple where your children play  
To be close to you is my desire

You cover me, you cover me  
You cover me safe under your wings

Lord, your love is so intense  
And your mercy never ending  
By the power of grace  
We can be your friends  
United under Jesus we are standing

### Renegade

A flip of the coin, a roll of the dice  
The shortest straw, too high the price  
My mind was a maze  
My heart was a stone  
I was half a world away from my home

A fight for life on a cobble- stone street  
A scream in the night, a kiss and a beat  
Running wild over the edge of a knife  
I was in the middle  
Between death and life

A crack in my soul, an ache in my brain  
A ticket to hell, I was going insane  
A demon in in rage, a weeping clown  
A restless man in the heart  
Of the lonesome town

A tear from God, from heaven a sign  
A flash in the dark, blood in the rain  
My sin washed away in a moment of joy  
Reborn as a child, God's prodigal boy

Like a renegade  
Like a renegade

### I fall

I fall into your hand  
My soul is broken and in pain  
This life is driving me insane  
I fall into your hand  
My soul is dried out in the heat  
I'm sick of all this hate and greed

Have mercy on me, Lord

On the horizon I can see  
A new life waiting there for me  
Beyond the clouds, beyond the rain  
Beyond the hurt, the fear, the pain

Sometimes I want to be far away

You wash away my tears  
But will you heal my worried soul  
But can you fill my inner hole  
Please Lord, stay close to me  
I can't make it on my own  
I can't make it all alone

### Show me how to love you

Show me how to love you with my heart  
(with my soul, mind, strength)  
And show me how to love my neighbor  
As I love myself

Make me weak  
That I learn to depend on you  
But make me strong when I need to  
Do the things you want me to  
Make me soft  
Don't let me forget how to cry  
But make me hard when I need to  
Divide the truth from the lie

Make me a fool to the world  
I don't care what they say  
But make me wise when it's hard  
To find the narrow way  
Make me die to myself  
I leave my old life behind  
But let me be reborn in Jesus  
Let me rise and let me shine

### Lift up my soul

Lift up my soul, Holy spirit  
Holy spirit, lift up my soul  
Lift up my soul and take control  
Holy spirit, lift up my soul

I surrender my whole life to you  
Your presence heals all my pain  
I rejoice in the light of your love

### Battle cry

Hear the battle cry ragin'  
Through this land ready to fight  
Young lives in the firing line  
Blown away in the night

To rule the world for a thousand years  
For the crown and the glory  
Once again to the battle fields  
It's the same old story

Hear them scream out for vengeance  
But the blood is on their hands, too  
Eye for eye and tooth for tooth  
And the victim is you

Drums and trumpets are calling  
And the guns are clinched  
To their hands  
This hate and this envy  
I will not understand

See the banners of justice  
Flutter high over murderous guilt  
Hear the devil laughing  
At the world that they build

Will the love of Jesus  
Teach them how to be free  
From this spell  
Before powers of darkness  
Lead them all to hell

I won't take up the gun  
To run with the dogs of war  
That's not what I'm fighting for

### Dear child

Progress moves on with giant steps  
The ages come and go so fast  
A whole decade has come to fade  
The present now will soon be past  
Ten years I struggled to be free  
Until my saviour made me see  
My father God in heaven cares for me

There's so much danger in this world  
So many traps to slip and fall  
To lose your way, to go astray  
Will you survive it after all  
I'll try to guide, I'll take your hand  
At your side I'll always stand  
Until I'm dead and buried in the sand

There may be hurt, there may be pain  
Times of destruction and of fight  
I pray for love from God above  
That he may lead you through the night  
That he may show you what to do  
That he may teach you what is true  
That he may guard your heart  
And speak to you

Dear child, I will be there for you forever
